**Committee on Water Resources
Thirteen Session
Beirut, 27-28 June 2019**

Biennium 2016-2017

EXPECTED ACCOMPLISHMENT (A)

Member States mainstream appropriate goals related to **sustainable development into national multisectoral strategies and action plans** for the integrated management of natural resources, including tools for measuring, monitoring and reporting.

EXPECTED ACCOMPLISHMENT (B)

Member States adopt platforms and resolutions on **regional cooperation** on shared water resources, energy networks and environmental sustainability to improve food, water and energy security.

EXPECTED ACCOMPLISHMENT (C)

Member States develop coordinated policies, strategies and frameworks for **climate change mitigation and adaptation and for disaster risk reduction** to enhance resilience and respond to the impact of natural and human-induced disasters.

Biennium 2018-2019

EXPECTED ACCOMPLISHMENT (A)

Increased alignment of member States' national plans with the Sustainable Development Goals by through drawing upon the **water-energy-food nexus**

EXPECTED ACCOMPLISHMENT (B)

Increased engagement by member States in regional and subregional processes in **support of agreements, strategies and standards related to water, energy, food and the environment.**

EXPECTED ACCOMPLISHMENT (C)

Strengthened resilience of member States and of vulnerable communities to **climate change and natural disasters.**

Field Projects

- Arab Integrated Water Resources Management Network (AWARENET)

- Arab Centre for Climate Change Policies

- RICCAR

- Food and Water Security in the Arab region

- MDG+ Initiative – ended December 2018

- ACCWaM – ended June 2018

- Developing the capacity of ESCWA member States to address the water-energy nexus for achieving the Sustainable Development Goals – ended December 2017

- Developing the Capacities of the Arab Countries for Climate Change Adaptation Using Integrated Water Resources Management Tools – ended

RICCAR: External Evaluation

- The project is **very well documented** and provides numerous publications, reports and **useful products of high quality** in addition to e-tools released for the first time for the Arab region.
- The project was **highly effective**, as on its completion date, it had achieved most of its expected outputs: a regional knowledge hub for climate and water resource information and modelling in the Arab region is available
- The project's objective was satisfactorily achieved since a **consultative and integrated methodological framework**
- The project is found to be likely sustainable at this stage on condition that a new phase is launched to: 1) take advantage of the **current momentum**, 2) consolidate the results already achieved (provide operational access to the regional knowledge hub and ensure its regular updating, and empower the Arab Climate Outlook Forum, and 3) conduct additional studies
- **The project played a significant role in producing knowledge and information about climate change impacts on water resources available in the Arab region**
