

Regional Workshop on the Use of Census Data for Development Planning and Scientific Research in Arab Countries

Rabat, 1-3 October 2019.

Organized by UN ESCWA

Nada AL HASSAN

UN-Habitat

Head of the Sub-Regional Maghreb Office

UN-Habitat's Mandate

- UN-Habitat is the United Nations Programme working towards a better urban future
- Its mission is to promote socially and environmentally sustainable human settlements development and the achievement of adequate shelter for all
- UN-Habitat is a Member of the United Nations Inter-Agency Standing Committee (IASC) the primary mechanism for inter-agency coordination of humanitarian assistance

UN-Habitat's URBAN THEMES

Legislation

Although needed for sound urban development, legal systems are among the major impediments preventing urban innovation. Read more about challenges relating to urban legislation and UN-Habitat's initiatives in that domain.

Mobility

Despite the increasing level of urban mobility worldwide, access to places has become increasingly difficult, and dependency on cars and other motorized transport is growing. Read more about today's mobility challenges and how UN-Habitat is addressing them.

Housing & slum upgrading

Today, 24% of the world's urban population lives in slums, and by 2030, about 3 billion people will be in need of proper housing. Find out more about what UN-Habitat is doing to overcome the housing challenges.

Safety

60% of all urban residents in developing countries have been victims of crime at least once over the past five years. Read more about safety in urban areas and about how UN-Habitat is addressing this challenge.

Climate Change

Cities are not only one of the main causes of climate change but are also heavily vulnerable to the consequences. Find out more about why and how cities should address climate change, and how UN-Habitat can help.

Gender

Despite the many opportunities offered by cities, women and men do not benefit equally from urbanization, with women generally being more vulnerable and excluded. Read more about UN-Habitat's initiatives addressing gender issues.

Human rights

Human Rights, including the rights to adequate housing and safe water and sanitation are contained in the Universal Declaration of Human Rights and international human rights instruments, including the International Covenant on Economic, Social and Cultural Rights which have been ratified by most UN Member States. These rights, once so endorsed, do not have a [...]

Water & Sanitation

Challenges related to water and sanitation in cities will magnify in the future due to an ever growing urban population. Find out more about the challenges and the ways to address them, as well as UN-Habitat's solutions.

Youth

By 2030, as many as 60% of all urban dwellers will be under the age of 18. Find out more about youth and the challenges they are facing, as well as UN-Habitat's initiatives and solutions for the younger generation.

Planning & Design

Rapid urbanization in the developing world and current car-centred cities are bringing about many challenges in the spatial distribution of people and resources. Learn more about how smart urban planning and design can enhance our cities.

Economy

Cities are the main creators of economic wealth, generating on average 75 per cent of a country's GDP. Find out more about the urban economic challenges ranging from employment to municipal finance, as well as UN-Habitat's initiatives regarding urban economy.

Reconstruction

The world has witnessed an increasing series of disasters which have resulted in the dramatic loss of human life, and the destruction of homes and infrastructure. Learn more about UN-Habitat's reconstruction work and solutions.

Energy

Energy is needed for urban development, but current reliance on fossil fuels brings up a number of challenges such as pollution and depletion of resources. UN-Habitat therefore helps cities to develop sustainable energy action plans.

THE NEW URBAN AGENDA

Sustainable Urban Development (Habitat III) in Quito, Ecuador, on 20 October 2016. It was endorsed by the United Nations General Assembly at its sixty-eighth plenary meeting of the seventy-first session on 23 December 2016.

The New Urban Agenda represents a shared vision for a better and more sustainable future. If well-planned and well-managed, urbanization can be a powerful tool for sustainable development for both developing and developed countries.

The New Urban Agenda has been translated to more than 30 languages, including the six United Nations official languages, as well as the most widely spoken languages in the world such as Hindi, Bengali or Portuguese. These translations reach more than eighty percent of the world's total population calculating the languages by total number of speakers.

RAPID MULTI-SECTORAL CITY PROFILING FOR 6 LIBYAN CITIES

Key findings and recommendations

- **Context:** History, the city regional network, administrative divisions, social composition, the conflicts and their effects,...
- **Demographics:** The city present population, spatial distribution, population displacements, migration,...
- **Economy:** Economic situation and activities, labour and employment, reintegration of combatants, war economy, financial situation
- **Multisector assessment:** Governance, urban planning, land use, damage, housing, poverty and living conditions, health, education, drinking water, electricity, roads and transportation, sewage treatment, waste management, pollution, cultural heritage,...

Libya Data Portal

- Geo-referenced and comprehensive damage assessment conducted with satellite imagery to help humanitarian actors prepare for reliable needs assessments.
- A platform to display city profiles, thematic overviews and damage assessments of Libyan cities
- Monitor the urban changes during and after the crisis
- Assist government counterparts, partner agencies and NGOs in planning their activities using a web-based mapping portal.
- Allows humanitarian actors to overlay various layers of analyses and intervene accordingly
- Assess urban complexities and plan area-based responses
- Plan recovery and reconstruction

PROPOSED CONSIDERATIONS for STATISTICS and CENSUSES for URBAN PLANNING

- Clear geographical demarcation for the data collection
- Participatory, multi-stakeholders and inclusive processes to conceive and draft the questionnaires , and to analyze them
- Statistics and Censuses to be harmonised , as much as possible, with the indicators developed under the Sustainable Development Goals
- Develop a rights-based approach in the collection and interpretation of data (targeting vulnerable peoples and Leaving No One Behind)
- Involve the private sector to foster Public Private Partnerships and inclusive economic development (Tourism, Industry, Real Estate, etc.)
- Collect data on the housing units (decent, healthy, safe, etc.)
- Collect data on access to basic services (water, sanitation, sewage, waste managementn, mobility, education, health)
- Targeted questions to women, persons with disabilities, migrants, refugees, IDPs, senior persons
- Data on access to property (property rights)
- Take into account climate change and climate adaptation themes

- Take part in the World Urban Forum 10, directly or by feeding the interventions of the officials representing your countries

UNO HABITAT
FOR A BETTER URBAN FUTURE

UN-Habitat's work in Libya

METHODOLOGY

DATA COLLECTION

KEY INFORMANT INTERVIEWS

One-to-one interviews with main stakeholders who have first-hand knowledge of the location.

- Municipality
- Stakeholders (mukhtars, religious/political influencers and (I)NGOs)
- Business holders
- Social services (SDCs, education and health facilities)

HOUSEHOLD SURVEY

A multisectoral survey conducted for a representative sample of Lebanese and non-Lebanese populations.

LITERATURE REVIEW

A desk review for an area's geographic and historic context, stakeholder's activities etc.

UN-Habitat's work in Libya

METHODOLOGY

FOCUS GROUP DISCUSSIONS

A total of 16 FGDs are conducted with Lebanese and non-Lebanese; female and male to gather qualitative data for the below cohorts.

- Children
- Youth
- Adults
- Elderly
- Parents with children with disabilities

Satellite Imagery Analysis

--Through spatial, multi-sectoral and inter-sectoral analysis using GIS

Mapping

=> a dynamic overview of the city is provided that identifies the neighbourhoods that are in critical

need, and key priorities for action in each sector
