

System of Environmental Economic Accounting

Land Accounts

March 2018

Land accounts

- Land cover
- Land use
- Land value
- Relationship to ecosystem accounting

Definition and scope

- Definition: Land is a unique environmental asset that delineates the space in which economic activities and environmental processes take place and within which environmental assets and economic assets are located.
- Scope: land area of a country including inland waters, coastal water bodies and intertidal areas.

Classifications

• Land cover, land use and land ownership

| Land cover classification (SEEA-CF, Table 5.12, p.178) 1 Artificial surfaces (incl. urban and assoc. areas) 2 Herbaceous crops 3 Woody crops 4 Multiple or layered crops 5 Grassland 6 Tree-covered areas 7 Mangroves 8 Shrub-covered areas 9 Shrubs and/or herb. veg., aquatic or reg. flooded 10 Sparsely natural vegetated areas | Land use classification (SEEA-CF, Table 5.11, p. 176) 1.1 Agriculture 1.2 Forestry 1.3 Land used for aquaculture 1.4 Use of built-up and related areas 1.5 Land used for maintenance and restoration of environmental functions 1.6 Other uses of land n.e.c. 1.7 Land not in use 2.1 Inland waters used for aquaculture or holding facilities 2.2 Inland waters used for maintenance and restoration of environmental functions 2.3 Other uses of inland waters n.e.c. |
|--|---|
| | |
| 11 Terrestrial barren land | 2.4 Inland waters not in use |
| 12 Permanent snow and glaciers | |
| 13 Inland water bodies | |
| 14 Coastal water bodies and intertidal areas | |

Land ownership: by industry (e.g. agriculture, mining) or by sector (e.g. public or private)

Physical account for land cover (hectares)

| | Artificial surfaces | Crops | Grassland | Tree- covered area | Mangroves | Shrub- covered area | Regularly flooded areas | Sparse natural vegetated areas | Terrestrial | Permanent snow, glaciers and inland water bodies | Coastal water and inter-tidal areas |
|----------------------------|------------------------|-----------|-----------|--------------------------|-----------|---------------------------|-------------------------------|---|-------------|---|--|
| Opening stock of resources | 12 292.5 | 445 431.0 | 106 180.5 | 338 514.0 | 214.5 | 66 475.5 | 73.5 | 1 966.5 | | 12 949.5 | 19 351.5 |
| Additions to stock | | | | | | | | | | | |
| Managed expansion | 183.0 | 9 357.0 | | | | | | | | | |
| Natural expansion | | | 64.5 | | | | | | | | 1.5 |
| Upward reappraisals | | | 4.5 | | | | | | | | |
| Total additions to stock | 183.0 | 9 357.0 | 69.0 | | | | | | | | 1.5 |
| Reductions in stock | | | | | | | | | | | |
| Managed regression | | 147.0 | 4 704.0 | 3 118.5 | 9.0 | 1 560.0 | 1.5 | | | | |
| Natural regression | | | | | 1.5 | 64.5 | | | | | |
| Downward reappraisals | | | | | | 4.5 | | | | | |
| Total reductions in stock | | 147.0 | 4 704.0 | 3 118.5 | 10.5 | 1 629.0 | 1.5 | | | | |
| Closing stock | 12 475.5 | 454 641.0 | 101 545.5 | 335 395.5 | 204.0 | 64 846.5 | 72.0 | 1 966.5 | | 12 949.5 | 19 353.0 |

Note: Crops include herbaceous crops, woody crops, and multiple or layered crops.

Land cover change matrix (hectares)

| | | Inc | reases (pos | itive numl | bers) and d | ecrease | s (negative | e number: | s) from | other l | and cov | ers | | |

| Shrub-covered area | 66 475.5 | | -1 560.0 | -69.0 | | | | | | | | | -1 629.0 | 64 846.5 |
| Regularly flooded areas | 73.5 | | -1.5 | | | | | | | | | | -1.5 | 72.0 |
| Sparse natural vegetated areas | 1966.5 | | | | | | | | | | | | | 1 966.5 |
| Terrestrial barren land | | | | | | | | | | | | | | |
| Permanent snow, glaciers and inland water bodies | 12 949.5 | | | | | | | | | | | | | 12 949.5 |
| Coastal water and intertidal areas | 19 351.5 | | | | | 1.5 | | | | | | | 1.5 | 19 353.0 |

Note: Including herbaceous crops, woody crops and multiple or layered crops.

Table 5.16 Monetary asset account for land (currency units)

| | | | Type of | land use | | | | |
|--------------------------------|-------------|----------|---|---|------------------------------|--------------------|--------------|-----------|
| | Agriculture | Forestry | Use of built-up and related areas | Land used for maintenance and restoration of environmental functions | Other uses of land n.e.c. | Land not in use | Inland water | Total |
| Opening value of stock of land | 420 000 | 187 500 | 386 000 | 2 000 | | | | 995 500 |
| Additions to stock | | | | | | | | |
| Acquisitions of land | 3 500 | | | | | | | 3 500 |
| Reclassifications | | 200 | 2 500 | | | | | 2 700 |
| Total additions to stock | 3 500 | 200 | 2 500 | | | | | 6 200 |
| Reductions in stock | | | | | | | | |
| Disposals of land | | 3 500 | | | | | | 3 500 |
| Reclassifications | | 1 250 | | 200 | | | | 1 450 |
| Total reductions in stock | | 4 750 | | 200 | | | | 4 950 |
| Revaluations | 18 250 | 15 350 | 65 000 | | | | | 98 600 |
| Closing value of stock of land | 441 750 | 198 300 | 453 500 | 1 800 | | | | 1 095 350 |

Issues with valuation

- Market values
- Based on recent transactions
- Composite asset
 - Soil resources
 - Buildings and structures
 - Land improvement
 - Etc...
- Changes in quality
 - Catastrophic events (floods)

Policy relevance

- Land cover
 - > Agreement on what exists on surface of country
 - > How and where this is changing (e.g., forests to crop?)
 - > Alignment of economic, environmental and social policies (e.g., where could timber harvesting have less impact?)
 - > Forest as a % of national territory
- Land use
 - > Agreement on designated use (e.g., what activities are allowed and not allowed?)
- Monetary asset account for land
 - > Is land being properly valued?
 - > Contribution to national wealth (increasing or decreasing?)

Data Sources

- Administrative sources cadaster maintained by a land registry office, tax authorities, or land information center
- Collection sources population and housing census, Agriculture survey and census, business survey, other type of survey and census data, and other governmental organizations information on land
- Satellite images sources Images of Earth collected by satellites

- Compilation Group Exercise (30m)
 - Situation:
 - Land cover units defined for two periods (Opening and Closing)
 - Need to calculate:

Land Cover Opening and Closing stocks,
Land Cover Change per class (with additions and reductions)

- •Physical Account for Land Cover
- Objective (Groups of 3-5):
 - 1. Transfer Land Cover from map to table
 - 2. Calculate Land Cover Change Matrix
 - 3. Calculate Physical Account for Land Cover
 - 4. Report and discuss results

Group Exercise: Step 1 – Calculate Land Cover

An extension

Using land accounts to inform carbon accounts

- Increasing atmospheric carbon is causing climate change:
 - > Increasing temperatures, changes in rainfall, sea level rise
- Information on carbon stocks and flows supports (among others):
 - > Assessing the impact of changes in land cover and land use on carbon stocks and carbon sequestration
- Carbon-related ecosystem services
 - > *Storage* = stored in soil, water and biomass
 - > *Sequestration* = removal from the atmosphere

Compilation group exercise (30 min)

- Situation:
 - Have land cover account
 - Need to calculate: carbon stock and carbon sequestration
- Objective (in groups of 3-5):
 - 1. Calculate a simplified carbon stock account
 - 2. Calculate account for ecosystem services from carbon sequestration
 - 3. Report and discuss results

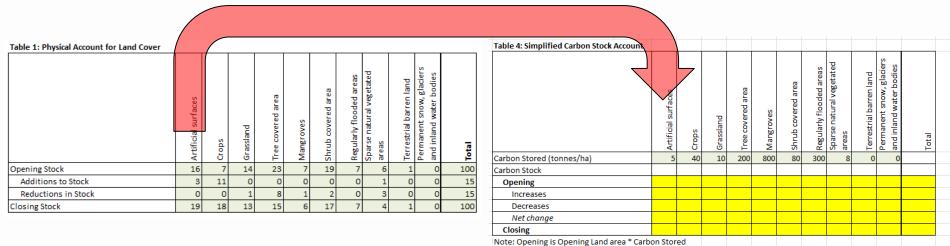

Group exercise: step 1

Step 1 – Calculate carbon stock account

Land cover account

Carbon stock account

Net change is Increases - Decreases

Multiply land cover area by carbon stored (lookup table) e.g. opening 16ha artificial surface * 5 tonnes/ha = 80 tonnes Net change = increases - decreases

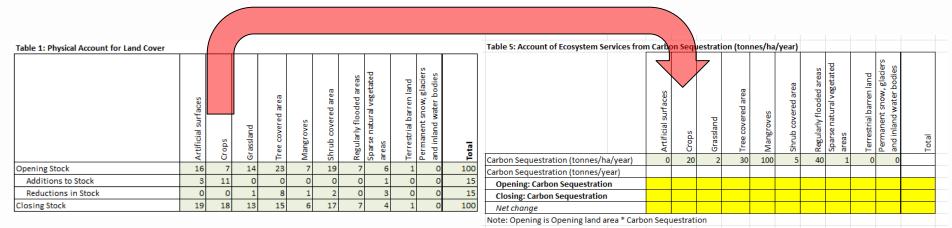

Group exercise: step 2

Step 2 – Calculate carbon sequestration

Land cover account

Carbon sequestration service

Multiply land cover area by carbon sequestration (lookup table) e.g. opening 7ha crops * 20 tonnes/ha/year = 140 tonnes/year Net change = closing - opening

Group exercise: questions

- Is everyone clear on the objectives?
- 30 minutes group work
- Please ask questions!
- Questions:
 - > Each group report:
 - Net change in storage
 - ⁻ Net change in sequestration
 - What was the main source of change?

| | Artificial surfaces | Crops | Grassland | Tree covered area | Mangroves | Shrub covered area | Regularly flooded areas | Sparse natural vegetated | | | Permanent snow, glaciers and inland water bodies | Total |
